ABOUT

Currently i have 3+ years of experience designing for the web, and specialize in the areas of user interface design, interaction design, visual design and prototyping. I synthesize the needs and goals of users, product managers, marketing and salespeople, user researchers, developers and testers to ensure the best possible experience.

EDUCATION

2010-2014

Shenkar College of Engineering and Design

B.Des degree. With Interaction design internship.

EXPERIENCE

2010-2014

Freelance work.

Working as a freelance designer while studying with various people and businesses on their projects: designing, wireframing, photographing, SEO websites promoting products and websites.

2014-2015

Simbla Ux/UI designer

It's a website and app building platform based on bootstrap framework and cloud computing environments.

Last two years I spent in agile environment of simblas design. From concept through wireframes, ui / ux and marketing design until it became a product that's making an impact on thousands of customers all over the world.
